Plumber Helper / Apprentice – Job Description

Position Summary:

The Plumber Helper/Apprentice assists licensed plumbers in installing, repairing, and maintaining plumbing systems in residential and commercial settings. This role is designed to provide hands-on training and practical experience while developing the technical skills required to become a licensed plumber.

Key Responsibilities:

- Assist plumbers with installation of water supply lines, drainage systems, and fixtures
- Carry and organize tools, equipment, and materials at job sites
- Cut, measure, and assemble pipes using hand and power tools
- Help with troubleshooting plumbing issues and repairs
- Maintain a clean and safe work environment
- Follow safety procedures and building codes
- Load and unload materials and equipment
- Support demolition and site preparation work when needed
- Attend required apprenticeship training classes (if applicable)

Skills & Qualifications:

- High school diploma or GED preferred
- Basic knowledge of hand and power tools
- Strong mechanical aptitude

- Ability to lift heavy materials (50+ lbs)
- Willingness to learn and follow instructions
- Reliable transportation
- Strong work ethic and punctuality
- Ability to work in confined spaces and various weather conditions

---

Preferred Qualifications:

- Enrollment in a plumbing apprenticeship program
- OSHA 10 certification
- Prior construction or trade experience
